Snapshot of Solicitors in 2010

On the 25th of October 2010:

- 23,760 solicitors held current NSW Practising Certificates
- 10,915 of solicitors in NSW were female (45.9%)
- 12,845 of solicitors in NSW were male (54.1%)
- 16,672 solicitors worked in private practice (70.2%)
- 2,760 solicitors worked in government (11.6%)
- 4,327 solicitors worked in corporations (18.2%)
- 12,302 solicitors worked in the Sydney CBD (51.8%)
- 7,362 solicitors worked in the suburbs of Sydney (31.0%)
- 3,056 solicitors worked in country areas of NSW (12.9%)
- there were 4,772 private law firms
- there were 161 government employers
- there were 1,268 corporate employers
- 22.8% of NSW solicitors in private practice (3,575) worked in firms with 40 or more partners
- 17.7% of solicitors working in private practice (2,772) worked in firms with between 2 and 4 partners
- 40.7% of solicitors in private practice (6,351) worked in sole practitioner firms
- sole practitioner firms constituted 86.4% of all private firms
- firms with more than 20 partners constituted 0.5% of all firms
- the average age of NSW solicitors was 41.7 years, with half of the profession (49.3%) aged under 40 years
- 10.2% of solicitors had been admitted for less than one year
- 31.4% of solicitors had been admitted for 5 years or less.

In the twelve months since October 2009:

- the profession grew by 3.9%
- the number of female solicitors increased by 5.5%
- the number of male solicitors increased by 2.6%
- 2,435 solicitors were issued with a Practising Certificate for the first time; 40.8% of these were male and 59.2% were female.

1 Introduction

The Role of the Law Society

The Law Society of New South Wales is the professional association representing the solicitors of New South Wales. The Law Society has two primary responsibilities: it acts as the licensing and regulatory authority by maintaining professional standards of conduct as well as investigating complaints against solicitors; it also represents the interests of its members. The role of the Society is summarised by the objectives set out in the Memorandum and Articles of Association, which include:

- to consider, originate and promote reform and improvements in the law;
- to remedy defects in the administration of justice;
- to make improvements in administration of legal practice;
- to represent generally the views of the profession;
- to preserve its integrity and status;
- to suppress dishonourable conduct or practices; and
- to consider and deal with all matters affecting the professional interests of members of the Society.

The Law Society is governed by an elected Council. The Council provides policy directions for the Law Society. It is assisted by a network of committees made up of volunteers from the profession and the public. Further information about the Law Society can be found on the Law Society's web page at <http://www.lawsociety.com.au>.

Objectives

The purpose of this report is two-fold:

- to collate and analyse information about the demographic profile of the practising profession in 2010; and
- to identify and monitor any trends in composition and profile by comparing this year's data with information from previous years.

Methodology

The information contained in this report is obtained from two sources. The first is the *annual census data* drawn from the Law Society's database on 25 October.

As the profession fluctuates over the course of the year, the Law Society uses October data to measure the profession for the reporting year, since October is the most stable month. While the Law Society has retained the records of solicitors for many years, this report relies on information collected and stored in the Law Society database since 1988. From that year forward, the coding of information has been reliable and consistent. The data used in this report were drawn from the database on 25 October 2010. This information relates only to those solicitors who held a current Practising Certificate on that day.

There may be many people in NSW who are working in law-related fields (some of whom hold law qualifications and may have been admitted to practice) who do not need to hold a Practising Certificate. Information about people working in these occupations is not collected or reported by the Law Society. The information contained in this report does not include interstate solicitors practising in New South Wales under the national practising scheme.

The second source of information for this report is the *Annual Practising Certificate Survey* that the Law Society has conducted since 1993/94. Each year, as part of the Practising Certificate renewal process, solicitors are invited to complete a voluntary survey. In addition to collecting a range of demographic data, the survey also gathers information about dominant areas of practice, income, hours of work and other issues relevant to the professional lives of solicitors. Response rates to the survey have typically been around 35-50% of all practising solicitors in NSW. Some of the results of these surveys are described in this report. The Practising Certificate survey and the data collected from it are anonymous.

The Law Society does not, and cannot, link the information collected through the surveys to individual solicitors or the organisations for whom they work.

Separate volumes of the Practising Certificate survey reports are available to members of the Law Society on request. Monthly updates on the Law Society's solicitor statistics are published on the Law Society web site at <http://www.lawsociety.com.au>.

Further information

For further information about this report and other statistical information held by the Law Society please contact:

2 Gender and Growth

On the 25th of October 2010 there were 23,760 solicitors with current New South Wales Practising Certificates. Of these, 10,915 (45.9%) were female and 12,845 (54.1%) were male. Figures from 1988 to 2010 for the number of solicitors in NSW by gender are given in Table 2.1.

Since 1988, the profession has grown by 142.3% (from 9,808 to 23,760), with an average annual growth rate of 4.1%. The number of female solicitors rose by 451.5% during the same time period (from 1,979 to 10,915). The number of male solicitors grew by only 64.1% (from 7,829 to 12,845).

The growth rate between 2009 and 2010 was 3.9%, with the number of female solicitors rising by 5.5% and male solicitors by 2.6%. The *average annual* growth rate for female solicitors since 1988 has been 8.1%, and 2.3% for males.

Figure 2.1 compares the number of male and female solicitors since 1988, while Figure 2.2 compares the annual growth rate over the same period.

Table 2.1 – Gender and growth, 1988-2010

Year	Male		Female		Total
	n	%	n	%	n
2010	12,845	54.1%	10,915	45.9%	23,760

3 Age

The average age of NSW solicitors in 2010 was 41.7 years – similar to 41.5 years in 2009 and 41.3 years in 2008. Half (49.3%) of all solicitors in NSW were aged under 40 years. As in previous years, female solicitors tended to be younger than males, with an approximate average age in 2010 of 37.3 years, compared to the male average of 45.4 years.

The largest age group for both female and male solicitors was 30 to 39 years (37.2% of females, 25.0% of males) however there were greater numbers of male solicitors than female solicitors aged 40 and over (for all age groups). As in previous years, females outnumbered males among the younger age groups - those aged under 29, and 30 to 39 (see Table 3.1).

Table 3.1 – Age profile of solicitors in 2010

Age	Male		Female		Total	
	n	%	n	%	n	%
29 years or less	1,536	12.0	2,900	26.6	4,436	18.7

Figure 3.1 – Age profile of solicitors in 2010 by gender (%)

Source: Law Society Data as at 25 October 2010.

4 Years since Admission

In the year ending 25 October 2010, 2,435 solicitors were issued with a Practising Certificate for the first time. Of these, 40.8% were male and 59.2% were female.

Years since admission figures indicate the number of years since solicitors were admitted in NSW as at the date on which the data were extracted from the Law Society database (25 October 2010). They do not take account of any breaks in practice when a solicitor may not have renewed a Practising Certificate, nor of solicitors not practising for a period but continuing to hold a Practising Certificate (for example during parental leave or an extended period overseas).

On the 25th of October 2010:

- just under a third of the profession (31.4%) had been admitted for 5 years or less;
- a similar number (31.8%) had been admitted for 6 to 14 years; and
- just over a third (36.8%) had been admitted for 15 years or more.

These figures are similar to those in 2009. Of all solicitors, 52.3% were admitted in the past 10 years.

The changing gender profile of the profession is reflected in the fact that more female solicitors than males were admitted in the past 10 years. Of all female solicitors, 65.6% have been admitted in the last 10 years, while this is true of only 41.1% of all male solicitors. Conversely, 58.9% of male practitioners were admitted for 11 years or more, compared with 34.4% of females. These findings are summarised in Table 4.1.

Table 4.1 – Years since admission in 2010

	Male		Female		Total	
	n	%	n	%	n	%
<1 year	993	7.7	1,442	13.2	2,435	10.2
1-5 years	2,024	15.8	3,020	27.7	5,044	21.2
6-10 years	2,266	17.6	2,700	24.7	4,966	20.9
11-14 years	1,344	10.5	1,256	11.5	2,600	10.9
15+ years	6,218	48.4	2,498	22.9	8,716	36.8
Total	12,845	100	10,916	100	23,761	100

5 Country of Birth

Country of birth data accessed on 25 October 2010 shows that the majority of solicitors practising in NSW were born in Australia (73.2%), with 61.0% born in NSW. These results are consistent with previous years.

The majority of solicitors born overseas were either from Asian countries (34.4%) or from the UK and Ireland (18.7%). These figures have remained reasonably consistent since 2001, although there continues to be a slight increase in the number of solicitors born in Asian countries (up from 28.3% in 2002) and a decrease in those born in the UK and Ireland (down from 23.6% in 2002). Relevant data are set out in Table 5.1 and Figure 5.1.

Table 5.1 – Country of birth from 2002-2010 (as % of total born overseas)

6 Location

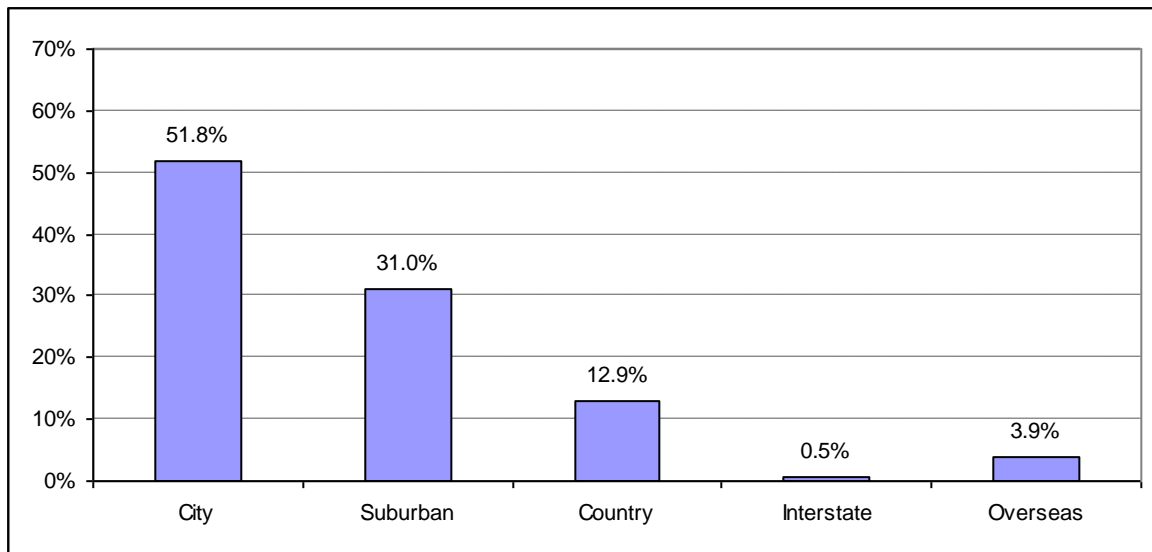

Location of Workplaces

As at 25 October 2010, just over half of the profession (51.8%) were practising within Sydney's CBD.

The proportion of solicitors working in the CBD has increased slightly since 1988 (then 49.9%), but in the last few years has remained relatively stable. Over the same period there has been a steady decline in the proportion of solicitors practising in rural areas - 16.7% in 1988 down to 12.9% in 2010.

Figure 6.1 shows the geographical breakdown for practitioners in 2010, while Tables 6.1 and 6.2 provide figures on practitioners' locations from 1988 to 2010.

Location of Private Law Firms

Since 1997 the Law Society has tracked the location of *private law firms*. The trend for increasing numbers of firms to be located in Sydney's suburbs at the expense of a CBD location continues. In 2010, just over half of all law firms (53.7%) were located in the Sydney suburbs. Of the remaining firms, just under a quarter (23.1%) were located in the CBD, while 22.2% were in country NSW. These figures are shown in Table 6.3.

Table 6.3 – Location of private firms 2003-2010 (see Table 1 of Appendix for data from 1997-2002)

Source: Law Society Data as at 25 October 2010. Note: the decline in interstate firms is due to the introduction of the national Practising Certificate regime and changes to the way interstate firms are coded on the NSW Law Society's data base.

Firms with 21-39 partners and 40 or more partners

Data collected for the 2010-11 Practising Certificate survey provides information on the location of firms with 21 to 39 partners, and with 40 or more partners. By contrast with the numbers of smaller firms located in Sydney's suburbs:

- 90.2% of firms with 21-39 partners and 87.9% of firms with 40+ partners, were located in the CBD; and
- 7.3% of firms with more than 40+ partners were located outside of NSW.

These results are similar to those from the 2009-10 Practising Certificate survey.

7 Employment Sector

The majority of solicitors in NSW (70.2%) continue to work in private practice. Of the other major sectors of the profession, 18.2% are corporate solicitors and 11.6% are government solicitors. Table 7.1 provides a snapshot of NSW solicitors working in the private, government and corporate sectors.

Table 7.1 – Solicitors in private, government and corporate practice

As Table 7.2 on the following page indicates, there are variations in terms of gender across the different sectors of the profession. The percentage of females working in the government and corporate sectors is higher than the percentage of males; while males are more strongly represented than women in private practice.

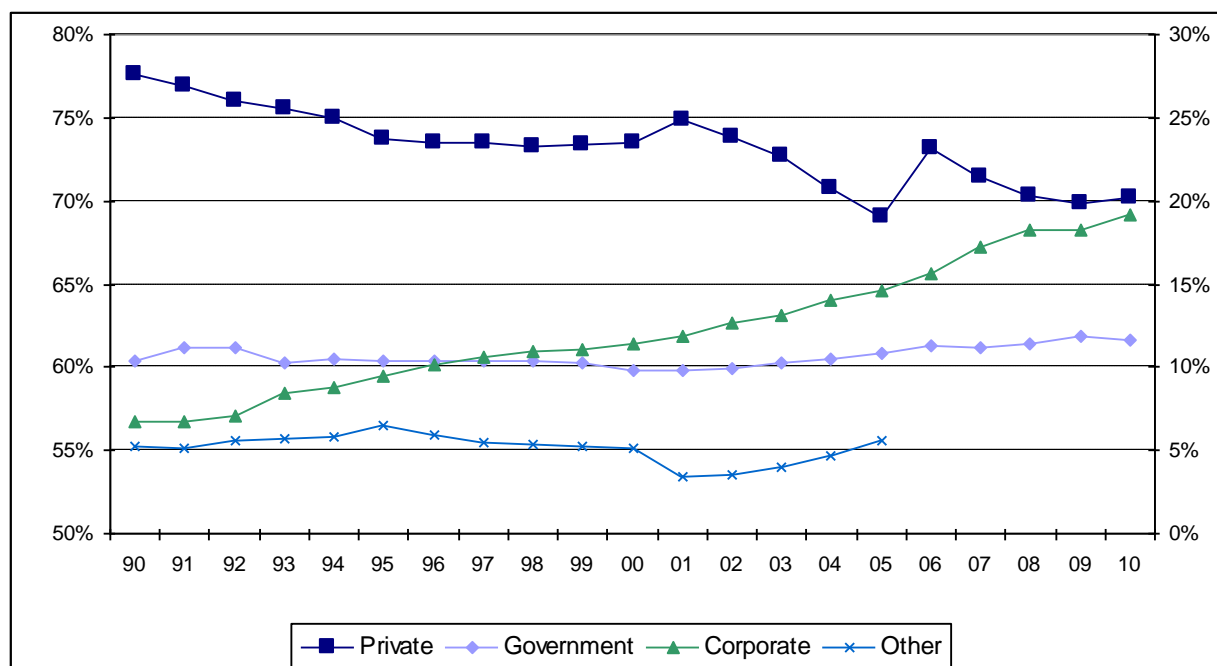

Table 7.2 – Gender by employment sector

Sector	Female		Male		Total

Source: Law Society Data as at 25 October 2010.

The proportion of all solicitors working in private firms has stabilised over the last three years, but overall has decreased over the period since 1988 (78.1% down to 70.2%). Despite this, the actual *number* of solicitors in private practice has increased. Since 1988 there have been large increases in the proportion of solicitors working in the corporate sector (6.7% in 1988, 18.2% 2010), while the proportion of solicitors working in government has remained fairly stable (10.3% in 1988, 11.6% 2009). Figure 7.1 illustrates the proportion of solicitors in each sector since 1988.

Figure 7.1 – Employment in each sector, 1988-2010¹ (%)

Source: Law Society Data as at 25 October 2010.

¹ These sectors include those who are unemployed and solicitors with no current practising details. Prior to May 2006 these solicitors were included in the 'Other' category. If a person has a multiple status (ie works for a company or government as well as private practice), it will be the private practice status that is shown in the statistics.

8 Diversity in the Profession

Women

As at October 2010, female solicitors made up 45.9% of the practising profession in NSW. Numbers of women entering the profession for the first time continue to slightly outweigh their male counterparts. In the year ending 25 October 2010, 59.2% of solicitors entering the profession for the first time were women – a similar figure to that of 59.5% in 2009. Table 8.1 provides further details on female solicitors.

Source: Law Society Data as at 25 October 2010. *Data taken from the 2010-11 Practising Certificate survey. The approximate average age is based on multiplying the total of each age group with each group's midpoint, which are totalled and then divided by the total number of females. Note this figure is an estimate as assumptions have been made with <24 and >75 age groups.

Indigenous Solicitors

In the 2010-11 Practising Certificate survey, 89 solicitors (just over 1% of respondents) identified themselves as Indigenous Australians. This represents significant growth from the 57 Indigenous respondents to the 2009 survey (44 in 2008, 35 in 2007).

In 2010, among the 89 Indigenous respondents:

- 58 were male
- 53 worked in private practice
- 11 were partners
- 22 were sole practitioners
- 11 were employees
- 5 were legal practitioner directors
- 13 worked in government
- 12 worked in corporate firms.

9 Private Practice

As at 25 October 2010, 70.2% of the profession worked in private law firms. This section presents a profile of the profession working in the private sector.

Individuals

Table 9.1 summarises information about solicitors working in private law firms.

Firm Size

In October 2010 there were 4,772 private law firms operating in NSW. The bulk of these (86.4%) were sole practitioner firms (firms with one principal). Of the remainder:

- 541 firms (11.3% of the total) had 2 to 4 partners
- 70 firms (1.5% of the total) had 5 to 10 partners
- 14 firms (0.3% of the total) had 11 to 20 partners
- 10 firms (0.2% of the total) had 21 to 39 partners
- 14 firms (0.3% of the total) had 40 or more partners.

Table 9.2 lists the number of partners and employees in each category of firm, while Figure 9.1 compares the proportion of firms in each category with the proportion of solicitors working for each type of firm.

Table 9.2 – Firm profile 2010

Number of Partners	Firms		Partners		Employees		All Solicitors in Private Practice	
	N	%	n	%	n	%	N	%
40 or more	14	0.3	919	12.7	2,656	31.6	3,575	22.8

2 to 4	541	11.3	1,289	17.8	1,483	17.6	2,772	17.7
Sole Practitioner	4,123	86.4	4,123	56.9	2,228	26.6	6,351	40.7
Total	4,772	100	7,246	100	8,404	100	15,650*	100

Source: Law Society Data as at 25 October 2010. *This figure does not equate with the total number of private practitioners indicated in Table 9.1 because it is derived from data incorporating solicitors with *dual status* – that is, those with more than one employer. It also includes solicitors working interstate and overseas, as well as those with a pending Practising Certificate, which the figure in Table 9.1 does not.

Figure 9.1 – Firm size vs solicitors in each firm type (%)

Source: Law Society Data as at 25 October 2010.

Since 1988, there has been a marked increase in the number of sole practitioner firms, a slow rise of firms with 21 or more partners, and a decline in medium sized firms. Since 1988, the total number of firms operating in NSW has increased by 94%.

Staff to principal ratios

Staff to principal ratios within the private profession vary by size of firm. In firms with a sole practitioner there is a ratio of 0.5 employed solicitors for every principal, and this increases to a ratio of 2.9 in firms with 40 or more partners. Figure 9.2 shows employee/principle ratios for different firm sizes.

Figure 9.2 – Ratio of employed solicitors to principals

Source: Law Society Data as at 25 October 2010.

Gender profile in private firms

There are significant differences in gender terms among firms of different sizes. Female solicitors are more likely than their male counterparts to work in larger firms with 40 or more partners; whereas male solicitors are more strongly represented in Sole Practitioner firms. Figure 9.3 illustrates the gender breakdown in law firms of different sizes.

Table 9.3 – Gender profile of employees and principals in private firms

		Sole Practitioner	2 to 4 partners	5 to 10 partners	11 to 20 partners	21 to 39 partners	40+ partners	Total
Female	Principal	929	228	78	38	51	221	1,545 (25.1%)
	Employee	1,102	768	483	283	392	1,579	4,607 (74.9%)
	Total (n)	2,031	996	561	321	443	1,800	6,152
	% of all females	33.0	16.2	9.1	5.2	7.2	29.3	100.0
Male	Principal	3,165	1,057	379	170	198	698	5,667 (60.5%)
	Employee	1,089	704	352	226	268	1,066	3,705 (39.5%)
	Total	4,254	1,761	731	396	466	1,764	9,372
	% of all males	45.4	18.8	7.8	4.2	5.0	18.8	100.0

Source: Law Society Data as at 25 October 2010. Note data was not provided for sole practitioners which explains a lower number of principals than has been recorded in previous years.

Figure 9.3 – Gender division of all solicitors in private law firms (%)

Source: Law Society Data as at 25 October 2010.

Data collected for the 2010-11 Practising Certificate indicates that males and females are relatively evenly represented among larger firms (45.9% male and 53.6% female for firms 21-39 partners; 43.8% male and 56.0% female for firms with 40 or more partners) (note some solicitors did not indicate their gender). However, greater numbers of *partners* in these firms are male, and greater numbers of *employees* are female. For instance, 83.3% of partners in firms with 21 to 39 partners are male, whilst two thirds (65.7%) of employees are female. Similarly, just under three quarters (71.0%) of partners in firms with more than 40 partners are male, and 62.2% of employees are female.

Years since admission

The years since admission profile of solicitors working in private practice varies according to firm size. For example, one third of those who had been admitted for less than one year worked in firms with 40 or more partners (34.3%). Conversely, among solicitors admitted for more than 10 years, the largest proportion were sole practitioners. Table 9.4 provides data on years since admission according to firm size.

Table 9.4 – Years since admission in private firms by firm size (%)

Firm Size	< 1 Yr	2- 5 Yrs	6-10 Yrs	11-15 Yrs	15+ Years
40 or more partners	34.3	34.8	28.7	22.0	13.3
21 to 39 partners	7.0	7.6	7.2	5.9	4.5
11 to 20 partners	5.2	6.7	5.2	4.8	3.5
5 to 10 partners	8.1	9.5	8.8	8.5	8.0
2 to 4 partners	15.7	15.1	16.2	19.0	19.9
Sole Practitioner	29.7	26.3	33.9	39.8	50.8
Total	100	100	100	100	100

Source: Law Society Data as at 25 October 2010.

These results differed somewhat with results from the 2010-11 Practising Certificate survey (see Figure 9.4 below).

Figure 9.4 – Years since first admitted by private firm size

Source: 2010-11 Practising Certificate survey.

Age Profile

The age profile of solicitors working in private firms is broadly similar to the age profile of the entire profession, although private practitioners tend to be slightly older than those in other sectors. In 2010 more than half of solicitors in private practice (52.6%) were aged over 40, while just over a quarter (26.5%) were aged between 30 and 39. The proportion of solicitors over 60 was a little higher in private practice (12.6%) than overall (10.0%). Figure 9.5 shows the age profile of solicitors in private practice compared with the whole profession.

Figure 9.5 – Age profile of solicitors in private practice compared with the whole profession (%)

Source: Law Society Data as at 25 October 2010.

Age Profile of large firms

Data collected in the 2010-11 Practising Certificate survey, indicates that firms with more than 21 practitioners tend to have younger practitioners. Just under half (48.1%) of practitioners who work in firms with 21 to 39 practitioners, and 60.3% of practitioners who work in firms with over 40 practitioners, were aged under 35. Younger practitioners tend to be employees and older practitioners to be partners in these firms.

10 Government Solicitors

As at October 2010, there were 2,760 government solicitors in NSW working across 161 government organisations. Information on these solicitors is presented in Table 10.1.

Table 10.1 – Government solicitors in 2010

Table 10.2 provides details about years since admission for government solicitors in New South Wales, while Table 10.3 provides information on their age profile. Notably, over half (53.6%) of male solicitors working in government were aged between 40 to 60 years of age, whereas female solicitors were skewed towards the *under 40* age group (56.3%).

12 Areas of Practice

Since 1993 the annual Practising Certificate survey has collected information about dominant areas of practice. In previous years, the survey asked that respondents nominate areas in which they usually spend 25% or more of their time. In 2010, in order to obtain a greater degree of accuracy, respondents were asked to indicate their 'main areas of practice' generally. This should be factored into any comparisons made with previous years' reports.

The 2010-11 Practising Certificate questionnaire was completed by 8,360 practising solicitors, representing 35% of all NSW practising solicitors as at June 2010.

Overall

Table 12.1 details the dominant areas of practice as reported by practitioners responding to the Practising Certificate Survey. In the 2010-11 survey, *Commercial Law* (31.2%) and *Conveyancing/Real Property* (29.5%) were the most commonly nominated areas of practice, followed by *Civil Litigation* (23.4%) and *Wills and Estates* (23.2%). These results are similar to those in 2009.

Table 12.1 – Areas of practice 2001/02 – 2010/11 (see Table 2 of Appendix for data from 1994-2000)

Employment Sector

The main areas of practice nominated by solicitors vary according to employment sector. As in previous years, there were substantial differences in 2010-11 in the responses of private, government and corporate lawyers. Among corporate lawyers, the areas of practice most often mentioned were *Commercial Law* (60%) and *Corporate Law* (53%). *Conveyancing/Property* (40%) remains the largest area of practice in the private profession. Among government lawyers, the most common areas of practice were *Criminal Law* (40%) and *Administrative Law* (32%). Table 12.2 lists the four most frequently nominated areas for each sector, as indicated by practitioners responding to the 2010-11 Practising Certificate Survey.

Table 12.2 – Main areas of practice by sector (%)

Private		Government		Corporate	
Conveyancing/Property	40%	Criminal Law	40%	Commercial Law	60%
Wills and Estates	33%	Administrative Law	32%	Corporate Law	53%
Commercial Law	32%	Civil Litigation	16%	Banking and Finance	25%
Civil Litigation	29%	Advocacy	14%	Intellectual Property	22%

Source: 2010-11 Practising Certificate survey.

Firm Size and Location within the private sector

Within the private sector, main areas of practice also varied by size and location of firms. For example, *Conveyancing/Real Property* was much more frequently mentioned by those working in suburban and country practices than those in city practices (see Table 12.3). This was also true for *Wills and Estates*, *Family Law*, *Small Business* and *Criminal Law*. By contrast, the areas of *Commercial Law*, *Civil Litigation*, and *Corporations Law* were mentioned more often by city practitioners than those in suburban or country locations.

In firms with fewer than five partners, the areas of practice most commonly reported were *Conveyancing/Real Property*, *Wills and Estates*, *Commercial Law* and *Civil Litigation*. In firms with 21 to 39 partners, areas of practice most commonly reported were *Civil Litigation*, *Commercial Law* and *Personal Injury*; in firms with 40 or more, *Commercial Law*, *Corporations Law*, and *Civil Litigation* were most commonly reported.

Table 12.3 provides information on selected areas of practice according to firm size and firm location, while Figure 12.1 illustrates differences in areas of practice by size of firm.

Table 12.3 – More common areas of practice by firm size and location (%)

13 Income

Income Overall

In 2010, respondents were asked to indicate their *gross* income in the previous financial year. As with 2009, this was a change from previous Practising Certificate surveys, where practitioners were asked to detail their 'real take-home income' (after expenses but before tax). Care should therefore be exercised in making comparisons with earlier year's figures.

Respondents were given the option of recording their approximate income or selecting one of 12 income bands. The overall income figures quoted in this section have been estimated by combining these two sets of data together. The figures for the 2010-11 survey (the latest) refer to the financial year ending 30 June 2009, 2009/10 results refer to the financial year ending in 2008, and so on.

Results for 2010 are presented in Table 13.1 and Figure 13.1. In 2009, an extra income bracket was added to the survey, such that practitioners earning greater than \$150,000 could indicate whether they earned between \$150,001 and \$200,000, or more than \$200,000 (in previous surveys practitioners could only indicate whether they earned more than \$150,000). For the financial year ending June 2009, the three highest income bands among solicitors in New South Wales were \$50,001-\$75,000, \$75,001-\$100,000, and \$100,001-\$150,000.

Table 13.1 – Annual income in 2008-09 financial year (%)

	Income 2007/2008 (%)	Income 2008/2009 (%)
\$20,000 or less	4.0	4.2
\$20,001 to \$35,000	3.5	3.2
\$35,001 to \$50,000	7.5	7.2
\$50,001 to \$75,000	17.9	18.0
\$75,001 to \$100,000	19.2	18.2
\$100,001 to \$150,000	17.6	19.0
\$150,001 to \$200,000	10.3	9.8
More than \$200,000	15.2	15.3

Employment sector

The Practising Certificate survey reveals differences in solicitors' incomes according to the sector in which they work. The growth in estimated mean incomes in the 2010-11 survey results can in part be attributed to respondents being asked their *gross* income rather than their real take home income as in previous years.

As in previous years, *corporate solicitors* earned more in the current financial year than their colleagues in other sectors, reporting an estimated mean income of \$156,500. This compares with an estimated mean income of \$115,300 among *private practitioners*, and \$97,700 among *government solicitors*. For practitioners working in *community legal centres*, estimated mean income was \$62,800, and for those in *non-legal employment* it was \$109,600.

Table 13.3 presents estimated mean incomes for each sector over the last seven years, while Table 13.4 sets out the reported income bands for each employment sector, as reported by respondents to the 2010-11 Practising Certificate survey.

Table 13.3 – Mean income by sector 2004/05-2010/11

Sector	2004/05 (fin year ending '03)	2005/06 (fin year ending '04)	2006/07 (fin year ending '05)	2007/08 (fin year ending '06)	2008/09 (fin year ending '07)	2009/10 (fin year ending '08)	2010/11 (fin year ending '09)
Private	\$84,900	\$85,600	\$84,900	\$92,800	\$94,800	\$115,700	\$115,300
Corporate	\$109,000	\$109,000	\$110,300	\$124,300	\$123,900	\$153,000	\$156,500

Source: 2010-11 Practising Certificate survey.

Private Practice

In the 2010-11 Practising Certificate survey, solicitors working in *city firms* tended to report higher incomes than those in *suburban* or *country firms*. The estimated mean income of solicitors in city firms was \$129,700, compared with \$101,200 for solicitors in suburban firms and \$98,400 for those in country areas.

The estimated mean income was lower for solicitors working in smaller firms than their counterparts in larger firms. The estimated mean income reported by solicitors for each firm size were as follows:

1-4 partners:	\$100,000
5-10 partners:	\$125,500
11-20 partners:	\$132,000
21-39 partners:	\$127,100
40 or more partners:	\$138,200

This year's mean incomes for firms with 21 to 39, and 40 or more partners were slightly down from the 2009 survey results (\$133,400 for 21 to 39 partners, \$138,200 for 40 or more partners). It is thought this is due to follow-on effects from the economic crisis in 2008-2009.

Gender

As in previous surveys, male respondents reported higher incomes than females overall. One third (33%) of all men, but only 17% of women, reported incomes over \$150,000; while 40% of all women, as against 27% of men, had incomes of \$75,000 or less.

Great care should be taken in comparing male and female salaries due to the fact that they are not equally distributed across the main employment sectors. As reported earlier, female practitioners tend to be younger and more recently admitted than males, and relatively more female practitioners work part time.

One way to more meaningfully assess income parity between the genders is to compare the reported incomes of *full-time private practitioners by years since admission*. As Table 13.5 shows, male incomes are still consistently higher than female incomes, even compensating for such differences. For example, the estimated mean income of male solicitors admitted for less than one year was \$62,100, compared to \$57,100 for females. For those admitted for between one and five years the average income was \$88,600 for males and \$77,000 for females.

14 Hours of Work

The survey asked whether respondents worked full time or part time, with part time work defined in the survey as 'less than 38 hours a week'.

Overall, 77.2% of the 2010-11 Practising Certificate respondents said that they worked full time and 14.9% said that they worked part time. The remaining 7.9% either were not currently in employment or did not answer the question.

Part Time Work

In the 2010-11 survey, 20.7% of female respondents, compared with 9.7% of male respondents said they worked part time. Part time work was more common among respondents over the age of 35, with 21.3% for those in age brackets 35 to 39, 19.2% for 40 to 49, and 16.9% for those aged over 50 years.

The percentage of practitioners working part time was similar among respondents working in private firms and among those in non-private practice (14.9% private practice, 15.8% non-private practice). Among respondents employed in Community Legal Centres, 22.8% reported working part time.

Within private law firms, part time work was most common among respondents in firms with up to four partners; 17.8% of these solicitors worked part time, as against 10.8% in firms with 11 or more partners. Among sole practitioners, 17.6% reported working part time.

Table 14.1 details the usual hours of work reported by solicitors working part time. Just under one third of these respondents (30.1%) reported working between 21 and 30 hours per week.

The average number of hours worked by practitioners in part time employment has been steady for the last 3 years and continues to hover around the 23.9 hour mark. As in previous years, the average for males (20.0 hours) was lower than for females (25.7 hours).

Table 14.1 – Hours worked each week by solicitors working part time

	Males		Females		All Respondents	
	No.	%	No.	%	No.	%

Source: 2010-11 Practising Certificate survey. Note total does not reflect total of males and females as gender not stated in some cases.

Full Time Work

Some 83.2% of male respondents and 70.1% of female respondents reported working full time.

The average hours worked per week reported by full time workers was 48.1 hours (49.2 for males, 46.9 for females). Private practitioners and corporate lawyers reported working very similar number of hours a week (49.1 and 48.4 hours respectively), whereas government lawyers worked 42.9 hours.

The average number of full time hours reported in the Practising Certificate survey has steadily declined over recent years – dropping from 49.2 in 2007 to 48.8 in 2008, 48.3 in 2009 and then to 48.1 in 2010 (see Table 14.2).

Table 14.2 – Average working week of full time solicitors by gender 1999/00-2010/11 (%)
