<sup>&</sup>lt;sup>1</sup> The IVI does not reflect the total number of job advertisements in the labour market as it does not include jobs advertised through other online job boards, employer websites, or in newspapers. Nor does it take account of vacancies filled using informal methods such as word of mouth.

## Series impact from the COVID-19 pandemic

The COVID-19 pandemic had a significantly negative impact on recruitment activity in March 2020. Over the month, new job advertisements fell by 5.3% (7600) in trend terms or 22.3% (35,300) in seasonally adjusted terms. This is the record monthly decline for the seasonally adjusted series, surpassing the 10.5% (22,900) fall during the GFC in January 2009.

For consistency with previous releases, the Vacancy Report will continue to focus on the trend series. Trend analysis provides more stable series for comparisons over time, however, it is initially resistant to large movements. If the large decline seen in the seasonally adjusted series in March 2020 persists in coming months, it is likely that there will be a large revision to the trend estimates in future releases of the Vacancy Report.

#### **Occupational Groups – Trend Series**

Job advertisements decreased in all eight broad occupational groups in March 2020. The strongest falls were recorded for Technicians and Trades Workers (down by 6.5%), followed by Clerical and Administrative Workers (6.4%) and Community and Personal Service Workers (5.3%).

Falls were also recorded in all occupational groups over the year to March 2020. The strongest falls, were recorded for Clerical and Administrative Workers (27.2%), followed by Technicians and Trades Workers (25.5%) and Managers (24.9%).

#### **Explanatory Notes**

- The monthly Internet Vacancy Index (IVI) is based on a count of online job advertisements newly lodged on SEEK, CareerOne and Australian JobSearch during the month. Duplicate advertisements are removed before the IVI job advertisements are coded by the Department of Education, Skills and Employment to occupations based on the Australian and New Zealand Standard Classification of Occupations (ANZSCO). The data are seasonally adjusted, trended and then indexed (January 2006 = 100).
- The IVI does not reflect the total number of job advertisements in the labour market as it does not include jobs advertised through other online job boards, employer websites, or in newspapers. Nor does it take account of vacancies filled using informal methods such as word of mouth. The IVI also does not take account of multiple positions being advertised in a single job advertisement. In addition, departmental research shows that around one fifth of vacancies are not advertised, with employers instead using informal networks, or selecting from job seekers who have directly approached them about job opportunities. More information can be found at <a href="http://lmip.gov.au/default.aspx?LMIP/GainInsights/EmployersRecruitmentInsights">http://lmip.gov.au/default.aspx?LMIP/GainInsights/EmployersRecruitmentInsights</a>.
- The Regional IVI concords job advertisements to 37 best fit regions across the states and territories from the three job boards.
