THE FUTURE OF LAW

9:45am-11:15am

FLIPtalks: Emerging Areas of Law

Digital Law

Digital Law is the rapid digitisation of everything business related and the impact on the nature of legal advice. In this session we highlight how legal and digital skills can help us drive law into the digital age.

About Michael Bacina

Michael advises companies dealing with Digital Law: the intersection of cutting edge technology, automation and innovation. As a former software developer, Michael has a rare combination of technical, regulatory and legal skills, which he leverages to assist his clients.

Michael works with FinTech, RegTech, blockchain, and digital asset projects from enterprise-level deployments bringing technology to existing business models, scale-ups, start-up ventures, cryptocurrency payment providers, crypto-asset exchanges, RegTech, InsurTech, PropTech and compliance for other technology deployments.

Since founding and exiting a successful IT business in the early 2000s, Michael has maintained an active involvement in software development. He is knowledgeable in the workings of (and legal issues surrounding) digital currencies and digital assets, blockchain projects, smart contract issues as well as FinTech and RegTech projects.
